DVM INSIGHT PLATFORM

DVMinsight Platform is a unique system that radiologists, referral hospitals, and other specialists can use to run their own branded service.

With DVMinsight Platform you will be able to provide your clients with a service that can handle images from any modality or vendor and allow you to efficiently maintain your service.

TELEMEDICINE

FEATURES INCLUDE

• The **DVMinsight Platform** is FULLY CUSTOMIZED with your logo so you can build your brand. Our website will be "skinned" with your banner and your reports will have your logo prominently displayed. Our goal is to support you and build YOUR brand.

• Your clients will come to YOUR website to view old reports, online images and reports; or share cases with specialists, pet owners, or other veterinarians. This is one more way that we help you build YOUR brand.

• Ability to accept studies from any modality, from any vendor.

• Hire as many radiologists or other specialists needed to build depth and support in your service. You negotiate your reimbursement rates with specialists directly.

• Your specialists can use ANY DICOM viewer to interpret their cases.

• All cases and reports sent to **DVMinsight Platform** are securely archived with our **DVMinsight ImageBank**.

• **DVMinsight Platform** uses a proprietary mix of medical grade compression, reversible compression, and packet shaping to speed downloads and provide you with an efficient teleradiology experience.

• Reports are emailed, faxed, and posted online as soon as the report is confirmed.

• Our experienced support staff will handle all of your IT needs.

• No need to buy expensive servers or software to get started. You don't even need any experience working with medical images to begin using **DVMinsight Platform**. All you need is a computer. Nothing could be easier than starting a service using **DVMinsight Platform**.

• Efficiency is essential and **DVMinsight Platform** will allow you to be as efficient as you can be.

COSTS

There are no costs to get started and configure your company with DVMinsight Platform. There is no equipment to buy. All you will need is a computer and a DICOM viewer. You will be setting your own fees and billing your clients directly. You do not pay anything unless you use the service. To use **DVMinsight Platform**, there are nominal fees for report distribution and to configure each of your clients.

When compared to purchasing servers, software, static IP addresses, and an IT staff, DVMinsight Platform is the most cost effective method of starting your service.
